

How to use resources to support Mathematical understanding

This Number Track is very flexible and can be used as a reference by children or to aid in calculation (such as counting on or counting back). This resource is easier than a number line for your children to use, as numbers are contained in boxes. Children can learn about the order of number as well as developing the knowledge of which numbers come before or after a given number.

This number line is so versatile, that it can be easily used at home to support your child learning to count or for maths games.
